

Portable Guardrail

Meets OSHA and Cal-OSHA standards

Designed to be easily installed section-by-section, the portable Guardrail system quickly adapts to provide passive control of fall hazards. Portable guardrail is used with SafePro's patented ballasted guardrail base. All prefabricated railing sections are available in hot-dipped galvanized or powder coated safety yellow, or several available custom colors. Available in 5ft, 8ft, and 10ft lengths.

Features and Benefits

- **Weight:** Guardrail system is 1.3 psi per base.
- **Storage:** Units nest together for easy storage and transportation.
- **Compliance:** Exceeds OSHA load rating requirements.
- **Advanced Base Design:** SafePro's ballasted base is 57 pounds and can alternate directions for stability.
- **Non-Invasive:** Non-Penetrating design with support pad (sold separately).
