

Reduce Employee Fall Hazards and Company Liability

Falls are one of the leading causes of occupational injuries and deaths each year.

OSHA's General Duty Clause requires employers to provide a hazard-free workplace but remediating occupational falls requires a keen understanding of your work processes, **ANSI standards**, and **OSHA Regulations**.

Key Questions To Ask When Selecting A Fall Protection Company

EHS professionals are under constant pressure to **create safer workplaces** and **reduce company liability**, which makes selecting the right fall protection company more important than ever. When evaluating potential vendors and their proposed solutions, consider the following key questions:

Is the fall protection company a turnkey provider offering.....

- Hazard Assessments / Risk Analysis
- In-House Engineering, Fabrication, Installation, and Recertification
- Rescue Training and Consulting
- Archived Storage of engineering documentation and OSHA records

Will the intended solution....

- Meet ANSI standards and OSHA regulations?
- Interfere with worker productivity?
- Allow for prompt rescue of injured or incapacitated workers?
- Represent a custom engineered approach to your application?

Does the fall protection company....

- Have specific experience in your specific market sector?
- Subcontract engineering, fabrication, installation, and/or recertification?
- Utilize personnel certified competent in fall protection?
- Assume total liability for the system?

Fall Protection Keeps Workers Safe

Fall Protection Solutions and Industries

Diversified Fall Protection is a complete turnkey provider of fall protection systems with decades of experience in a wide range of markets and applications. **Contact us for expert assistance** for all your fall protection safety requirements.

Fall Protection Solutions
